Managing green open access in the library

UKSG Open access: an introduction

Wendy White, Head of Scholarly Communication
University of Southampton
21 May 2013
Governance and policies
Decisions and discussions

- Repository designated a core corporate system like HR, Finance and Student Records
- Has its own Systems Board reporting to University Systems Board which has governance for resource allocation
- University Research and Enterprise Group advises the PVC Research on policy
- Other relevant fora for discussions e.g. REF Planning Group, Faculty committees
- Most institutions have links to one or more of these routes

Research and Innovation Services

Faculty Administrators and Communications
Requirements and encouragements

• Requirement to deposit post-prints of journal articles and conference proceedings where this is permitted by the publisher

• Emphasis on author involvement and encouragement over compliance

• Encouragement to deposit many other forms of research output and pre-prints where this does not jeopardise publication

• Focus on benefits to authors and trusted approaches
Content and usage
Other OA material includes art items and some datasets
Around 7000 OA articles and 7000 OA conferences
Over 1000 OA book sections and over 100 OA whole books
Downloads and uploads

- 192,969 downloads a month
- Google analytics
- IR Stats service
- RSS feeds, twitter, alerts
- Integration with library search
- 1084 deposits a month running at about 20% with OA access
- Even flow of uploads
- Top 5 countries this month UK, US, India, China, Germany
Adding value and support
Tools as part of researcher’s workflow and publication lifecycle

Import/export functions – xml, reference managers, DOI, other services like PubMed, ArXiv and Web of Knowledge

Not just about “final publication” - store early drafts to share with co-authors, public preprints and postprints, request a copy facility

Not just about “text” – describe and display art and music

More use of institutional repositories for data as push for open data gathers momentum e.g. JISC funded DataPool (Soton), KAPTUR (VADS) and Essex RDR
Automating DataCite DOIs – eCrystals example

- Ready to go!
- Easy to modify software
- Automating metadata not decisions

Added value through developing expertise

Guidance on copyright, licences and versions from editorial team

Quality assurance to ensure accurate metadata to maximise exposure, harvesting, presentation on websites

Dedicated editorial team but important issue linking to many library roles e.g. liaison staff, loans, digitisation lab

Engage with researchers to discuss international developments e.g. White House memo on expanding access to research, Finch review, RCUK policy
Training and guidance
Individual and group support

- Workshops integrated into Graduate Centre for PGRs and Professional Development Unit
- Bespoke sessions for Departmental Seminars
- Can cover issues relevant to research and teaching
- Not just use of repositories but broad context of open access
- Deskside one-to-one support, on screen guides, dedicated enquiry service
- Start up service for new staff
Embedded and bespoke workshops
Hosting content – working papers, reports, theses

Southampton Statistical Sciences Research Institute (S3RI)

The Institute brings together staff from across the University for research in methods and applications of Statistics

Latest news

Southampton plays host to national conference
This year’s national Research Students Conference (RSC) in Probability and Statistics is being held at the University of Southampton.

S3RI Special Seminar 10 Jan 2012
The next S3RI Special Seminar will be given by Peter Diggle (Lancaster University), will be titled “Model-based geostatistics for tropical disease epidemiology”. The seminar will take place on Thursday 19 January 2012 at
