OAPEN is an online library and publication platform, providing access to quality-controlled collections of 29,000+ peer reviewed open access books, edited collections, and chapters

The Directory of Open Access Books (DOAB) is digital discovery service indexing over 70,000 scholarly, peer-reviewed, open access books, edited collections, and chapters from 600+ publishers, in 60+ languages

OpenEdition

A SHARED MISSION

OAPEN and DOAB share the same mission to:

- increase discoverability and visibility of OA books
- promote and build trust for OA book publishing

POSI

The Principles of Open Scholarly Infrastructure (POSI) offer a set of guidelines by which open scholarly infrastructure organisations and initiatives that support the research community can be run and sustained

1 Accountability (governance)

Keeping our language clear to avoid confusion around our stakeholder and governance roles, making our operations more transparent, developing a documented process should OAPEN Library cease to exist

2 Funding (sustainablity)

Generate a surplus to be re-invested in developing the organisation and create a contingency fund to cover 12 months of operational costs

3 Community (insurance)

Protect community interests by clearly stating we are openly licensed and adding a CC BY 4.0 license to our websites, the OAPEN Library and DOAB directory

DEPOSIT

The OAPEN Deposit Service supports open access policies of research funders and practitioners, and provides an institutional uploading service for researchers and publishers to deposit publications that are covered by a mandate

Publications can be aggregated by harvesting, bulk uploading, or manually uploading on a web-based system, or through third parties

Funders including FWF, SNSF, KU, ERC, DFG, NWO, and Wellcome use our Deposit Services and their requirements are detailed on our website

We collborate with Portico for digital preservation of OAPEN content

DISSEMINATE

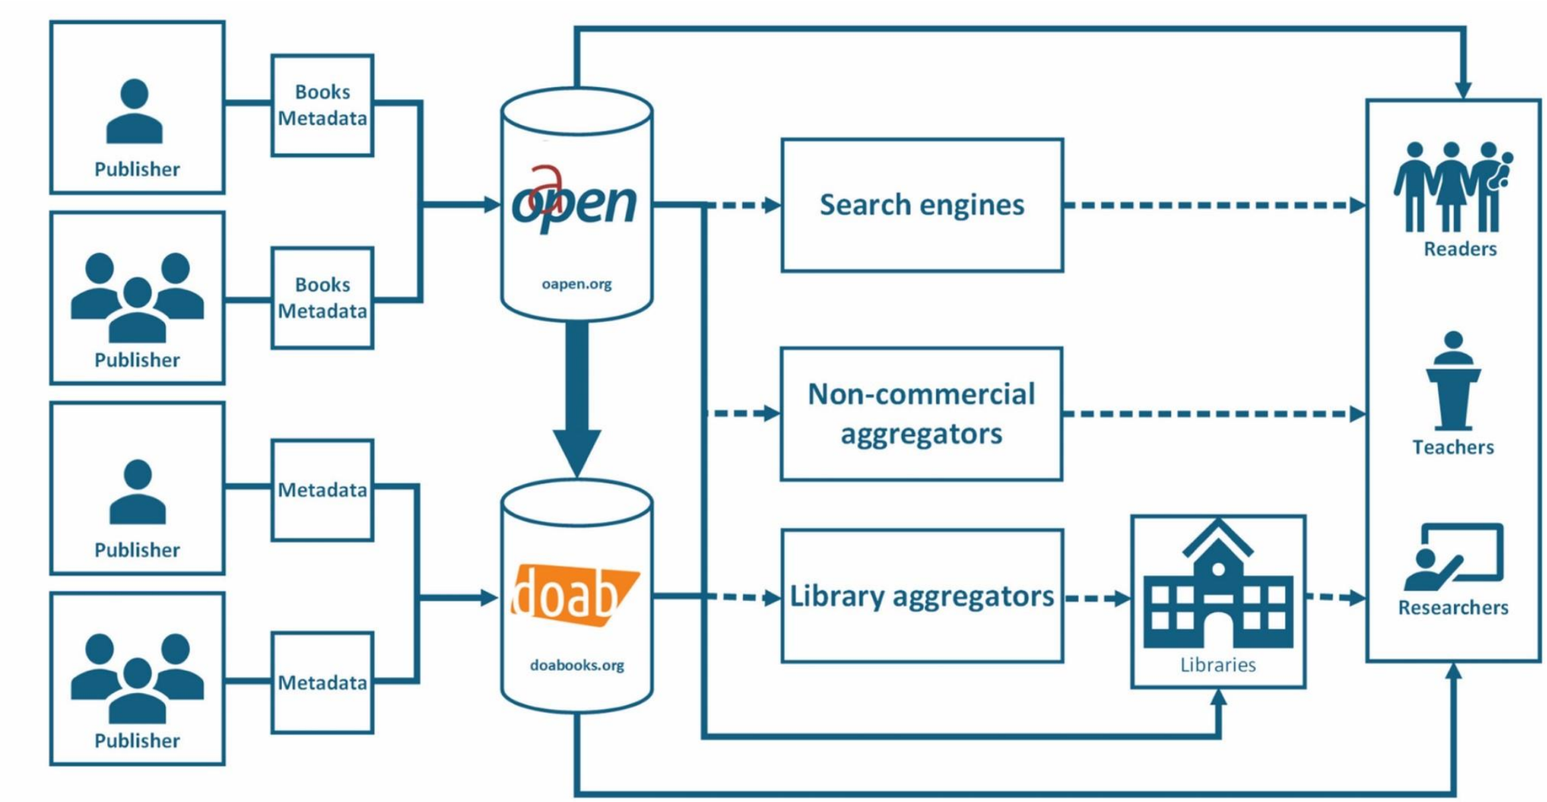

We provide free, daily metadata feeds in various formats to libraries and their service providers, and the metadata can be harvested using the OAI harvesting protocol

Metadata available in ONIX 3.0, MARCXML, CSV, RIS, KBART formats

ProQuest, ExLibris, EBSCO Discovery Service, WordCat, BASE, Europeana

OAPEN.org optimised for search engines and indexed by Google Scholar

REPORTING

The OAPEN Dashboard provides COUNTER conformant usage statistics to publishers, funders, and libraries, enabling them to view usage based on title or location

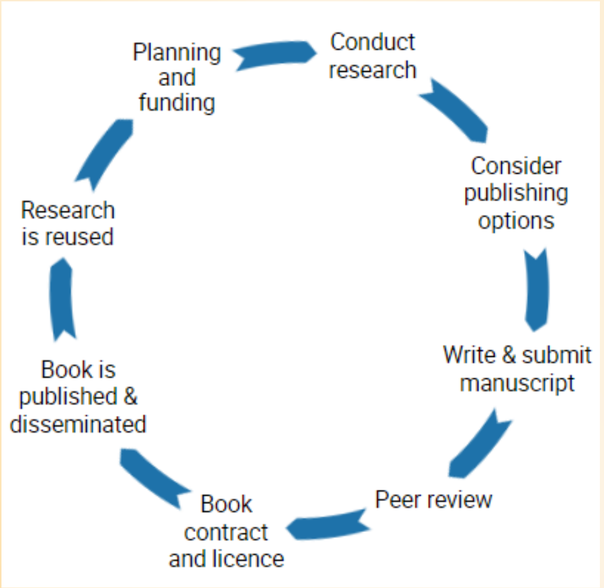

- Data is automatically updated on a monthly basis
- Data is based on R5 of the COUNTER Code of Practice
- Built-in filter for improper usage to prevent duplication of downloads

OA BOOKS TOOLKIT

The OAPEN Open Access Books Toolkit seeks to help researchers better understand OA book publishing and increase trust in open access book publishing

A global, multi-stakeholder initiative consisting of the research community, publishers, open access organisations, funders and research support

Strives to be an authoritative, credible and stakeholder-agnostic resource for users worldwide

OAPEN
OA Books Toolkit

TRUSTED PLATFORMS

DOAB collaborates with several trusted platforms to enhance the discoverability of open access books and create a more seamless process for publishers to list their open access books in DOAB

OAPEN Library, OpenEdition, Project MUSE, SciELO Books are all part of the DOAB Trusted Platform Network

The DOAB Trusted Platform icon helps users recognise them

Aim to enhance discoverability, simplify metadata integration processes, and increase trust in open access book platforms

doab trusted platform

PRISM

The Peer Review Information Service for Monographs (PRISM) is a standardised way for academic publishers to display information about their peer review processes

All peer review processes are visible at the publisher level and the specific peer review process applied to an individual publication is displayed on that level

The PRISM logo is visible on the DOAB website next to a publisher who participates in this service and next to individual books that are published by that publisher

Aims to provide transparency about peer review process(es) and build trust in OA book publishing

PROJECTS

OAPEN is involved in a variety of community engagement projects aimed to support the transition to open access for monographs

PALOMERA

Drive the transition towards more open access to academic books through policy development

Books Analytics Dashboard (BAD)

Create a sustainable OA book focused analytics service

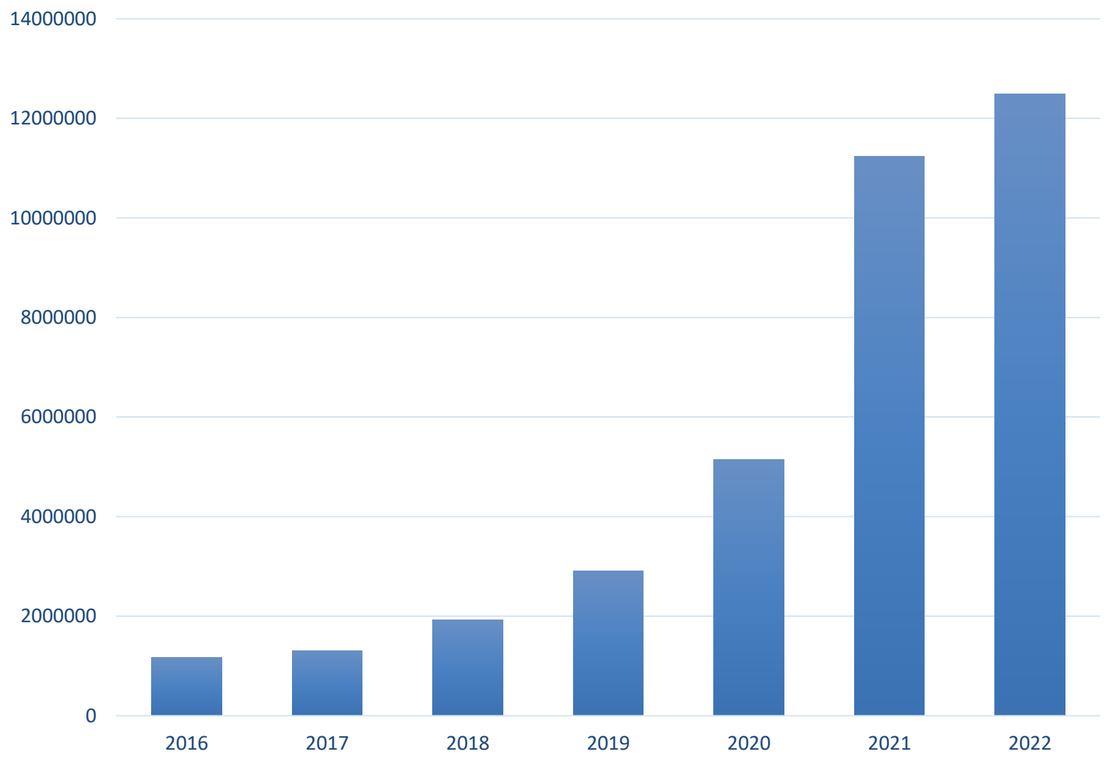

Open Access Books Network (OABN)

An OPERAS SIG, the OABN is a space for passionate conversations about OA books

OPERAS-P

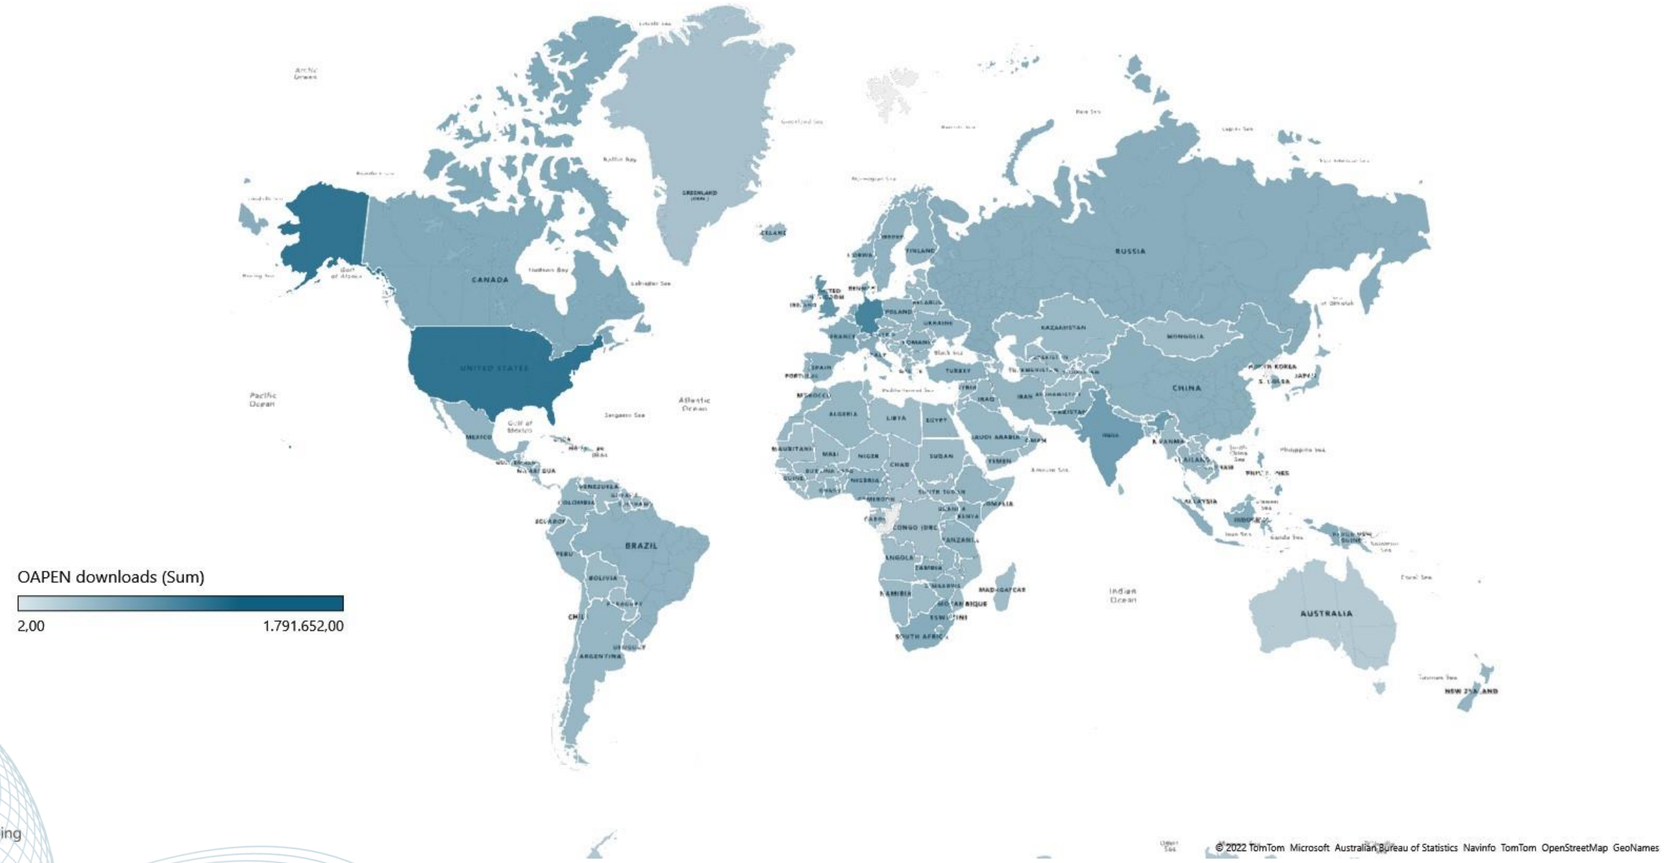

Supporting OPERAS on its way to becoming an ERIC and developing the required infrastructure

IMPACT

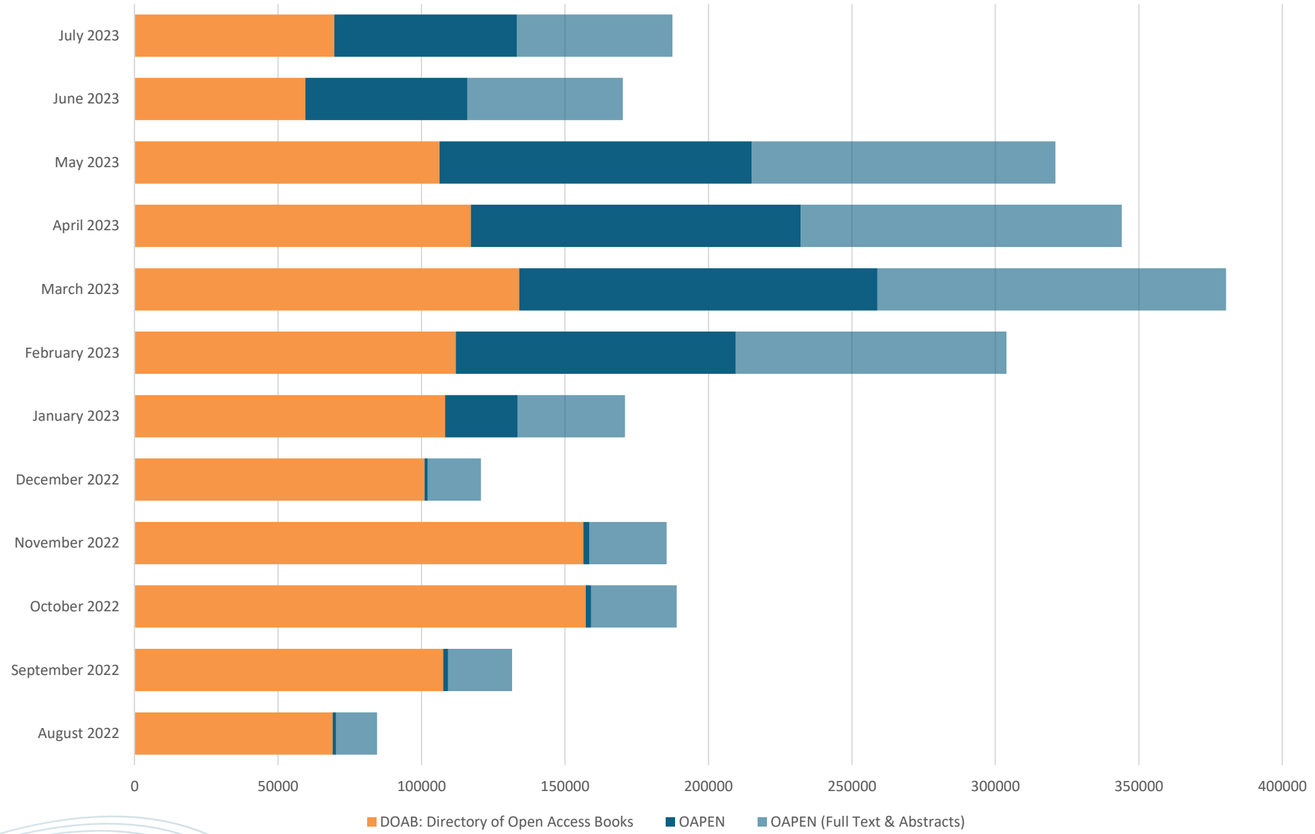

COUNTER downloads from OAPEN Library by Title

IMPACT

COUNTER downloads from OAPEN Library by Country
